PROFILE

Software Engineer (C#/.NET) building internal tools, backend services and automation workflows, with hands-on game development in Unity and Unreal. First Class Computer Games Design & Programming graduate.

SKILLS

Programming Languages & Frameworks: C#, .NET, SQL, JavaScript, Blazor, HTML, CSS

Technical Tools: Azure DevOps, Kubernetes, Docker, CI/CD, Git, Postman, Grafana, Kibana

Game & Creative Software: Unity, Unreal Engine, Blender, Blueprint, Photoshop, Premiere, OBS

PROFESSIONAL EXPERIENCE

Software Engineer in Test, Smartodds Limited, London

Jul 2025 – Present

- Developed internal tools in C# and .NET including WinForms applications and background services, with contributions to an existing Blazor dashboard
- Built monitoring and alerting tools integrated with Microsoft Teams and email, with visibility into Grafana dashboards and Kibana logs to enable early detection of data issues
- Deployed containerised services using Kubernetes and Docker for scalable environments
- Migrated 15 QA platform services from .NET 8 to .NET 10 and created a reusable build template
- Developed automated tests within Azure DevOps pipelines for microservices and APIs, covering REST endpoints, MassTransit messaging, and real-time WebSocket data
- Worked with PostgreSQL and MySQL databases, writing queries across multiple databases for analysis and data validation, and performing targeted inserts, updates, and deletes within the QA database
- Contributed to technical design discussions, code reviews, debugging, and issue resolution, working closely with developers

QA Tester, West Pier Studio, Brighton

Apr 2024 – Jun 2025

- Collaborated with Unity and web developers on Web, WebGL, iOS, and AR projects (Deck, Pergola, Fence Planner, and analytics dashboard)
- Built and maintained automated tests using NUnit, Selenium WebDriver, and C#, validating user login flows across multiple browsers, ensuring cross-platform reliability
- Wrote and maintained 200+ unit tests for core libraries to improve test coverage and code quality
- Developed and executed test plans and cases in TestRail, driving continuous QA process improvements
- Performed API and MySQL database testing across environments, verifying functionality and data integrity

Service Administrator, IPG Photonics, Coventry

Sep 2023 – Mar 2024

- Coordinated service requests, quotes, scheduling, and customer/partner communication
- Managed stock, order fulfilment, dispatch, pickups, and customer site visits

QA Technician, Codemasters, Southam

Apr 2019 – Aug 2020

- Collaborated with the mobile development team on F1 Mobile Racing, a live service app for iOS & Android
- Tested gameplay, UI/UX, monetisation; logged and prioritised bugs in Jira with Confluence documentation
- Used GameSparks to monitor backend activity, add in-game assets, gather logs, and report exploits, including currency manipulation
- Delivered QA for live updates and app store releases within agile sprint cycles

PROJECTS

[Portfolio, 3D Website](#)

Responsive website with mobile support and 3D worldspace built using React Three Fiber

[Tankeo Drift, Roguelike Game](#)

Endless roguelike game with procedural levels, enemies, upgrades, and replayable gameplay, built in Unity

[Procedural Terrain Shader](#)

Three.js shader generating procedural terrain with water, sand, grass, rock, and snow via noise functions

EDUCATION

BSc (Hons) Computer Games Design and Programming First Class Award
Staffordshire University

Sep 2020 – Jun 2023

- **Individual Games Technology Project - 87%.** Developed a 3D dungeon crawler game in Unreal Engine 5 with procedural levels, scalable AI, unique floor bosses, and a tier-based upgrade system
- **AI Scripting for Games - 75%.** Built AI agents in Unity using C# with A* pathfinding and state-driven logic, enabling dynamic navigation and context-aware decision-making in gameplay environments

A Levels & GCSEs, Princethorpe College, Rugby

Sep 2011 – Jun 2018

- **A-Levels:** ICT, Geography, English
- **10 GCSEs** grade A-C, including Maths and English

PERSONAL

Achievements: *St Johns First Aid Certificate | Bronze, Silver, Gold Duke of Edinburgh awards | Sports Diver Licence*

Charity Events: *40-mile walk to raise money for Mary's Meals | Winter Wolf Run | 2 years of volunteering at Leamington Spa Park Run | Leukaemia Research Bikeathons & the Marie Curie Swimathon*

Interests: *Game jams | Reading horror novels and classic literature, fond of works by Robert McCammon, Stephen King, Ray Bradbury, and H.G Wells | Keen athlete enjoying tennis, running, climbing, and scuba diving*
